

### **Amendments to the Claims:**

Please amend the claims as shown in the following listing of claims:

1. **(currently amended)** A device for displaying at least one picture personal photograph of a user, said device comprising, in combination:
  - a support member;
  - a plaque including a plate member and an adhesive layer on a side of the plate member for adhering the picture personal photograph to the plate member; and
  - wherein the plaque further includes a release layer covering the adhesive layer and removable from the adhesive layer such that the adhesive layer remains on the plate member upon removal of the release layer and is exposed for attachment of the personal photograph thereto;
  - wherein the user removes the release layer from the plaque and adheres the personal photograph to the adhesive layer to display the personal photograph on the plaque;
  - a swivel hanging the plaque from the support member and having a rotational axis;
  - wherein the swivel is a barrel-type swivel connector; and
  - wherein the swivel permits unlimited rotational movement of the plaque about the rotational axis in either direction upon application of external forces thereto.
2. **(currently amended)** The device according to claim 1, wherein the plaque includes another adhesive layer on an opposed side of the plaque plate member for adhering another picture personal photograph and another release layer covering the another adhesive layer, and wherein the another release layer is removable from the another adhesive layer such that the another adhesive layer remains on the plate member upon removal of the another release layer and is exposed for attachment of the another personal photograph thereto.
3. **(original)** The device according to claim 1, wherein the plate member comprises paperboard.
4. **(original)** The device according to claim 1, wherein the plate member comprises a magnetic material.

5. **(original)** The device according to claim 1, wherein the plate member comprises a luminescent material.

6. **(cancelled)**

7. **(original)** The device according to claim 1, wherein the support member is adapted to rest on a table top.

8. **(original)** The device according to claim 1, wherein the support member is adapted to support a plurality of the plaque members.

9. **(original)** The device according to claim 1, wherein the support member includes a hook.

10. **(original)** The device according to claim 1, wherein the support member includes a suction cup.

11. **(original)** The device according to claim 1, wherein the support member includes a magnet.

12. **(currently amended)** A device for displaying at least one ~~picture~~ personal photograph of a user, said device comprising, in combination:

a plaque including a plate member and an adhesive layer on a side of the plate member for adhering the ~~picture~~ personal photograph to the plate member; and

wherein the plaque further includes a release layer covering the adhesive layer and removable from the adhesive layer such that the adhesive layer remains on the plate member upon removal of the release layer and is exposed for attachment of the personal photograph thereto;

wherein the user removes the release layer from the plaque and adheres the personal photograph to the adhesive layer to display the personal photograph on the plaque;

a swivel secured to the plaque for hanging the plaque and having a rotational axis;

wherein the swivel is a barrel-type swivel connector; and

wherein the swivel permits unlimited rotational movement of the plaque about the rotational axis in either direction upon application of external forces thereto.

13. **(currently amended)** The device according to claim 12, wherein the plaque includes another adhesive layer on an opposed side of the ~~plaque~~ plate member for adhering another ~~picture~~ personal photograph and another release layer covering the another adhesive layer, and wherein the another release layer is removable from the another adhesive layer such that the another adhesive layer remains on the plate member upon removal of the another release layer and is exposed for attachment of the another personal photograph thereto.

14. **(original)** The device according to claim 12, wherein the plate member comprises paperboard.

15. **(original)** The device according to claim 12, wherein the plate member comprises a magnetic material.

16. **(currently amended)** ~~The device according to claim 12,~~ A device for displaying at least one picture comprising, in combination:

a plaque including a plate member and an adhesive layer on a side of the plate member for adhering the picture to the plate member;

a swivel secured to the plaque for hanging the plaque and having a rotational axis; wherein the swivel permits unlimited rotational movement of the plaque about the rotational axis in either direction upon application of external forces thereto; and

wherein the plate member comprises a luminescent material.

17. **(cancelled)**

18. **(cancelled)**

19. **(cancelled)**

20. **(cancelled)**

21. **(cancelled)**

22. **(cancelled)**

23. **(cancelled)**

24. **(cancelled)**

25. **(new)** The device according to claim 1, wherein the plate member has planar and parallel side surfaces and an edge forming one of a triangle, a star, a flower, a diamond, an oval, and a heart.

26. **(new)** The device according to claim 1, wherein the plate member has an opening sized and shaped to cooperate with the swivel to connect the swivel to the plaque.

27. **(new)** The device according to claim 12, wherein the plate member has planar and parallel side surfaces and an edge forming one of a triangle, a star, a flower, a diamond, an oval, and a heart.

28. **(new)** The device according to claim 12, wherein the plate member has an opening sized and shaped to cooperate with the swivel to connect the swivel to the plaque.
